

# Direction of Ethernet Connection

## Parameter of Ethernet

### Wire & Wireless Parameter

- Spec43: Connect mode. 0=Disable; 1=Server Mode; 2=Client Mode (Using in WAN normally).
- Spec44: Re-connect interval. **Please keep default.**
- Spec45: Re-configuration if parameter changes. **Please keep default.**
- Spec150~153: Device IP. If Spec153=0, the device will use DHCP to obtain an IP automatically.
- Spec154~157: PC IP. This IP only used in Client Mode(Spec43=2).
- Spec158~161: Default gateway.
- Spec162~165: Subnet mask.
- Spec170~173: Primary DNS.
- GlobalText19: Server's Domain Name: Only used in client mode, and Spec154~157 all are "0"

### Wireless Only Parameter (Only for device whose integration Wi-Fi)

- Spec50: 0=Using Wire-Ethernet; **1=Using Wireless-Ethernet. (Reboot after you change this parameter)**
- Spec51: Security Mode: 0=No Security; 1=WEP; 2=WPA/WPA2
- Spec53: Domain Type: 0: FCC; 1: IC; 2: ETSI; 3: Spain; 4: France; 5: JapanA; 6: JapanB (**Please keep default if you do not know it**)
- GlobalText15: Wi-Fi SSID.
- GlobalText16: Wi-Fi Security Password.

### Operation steps of Connecting to Wi-Fi

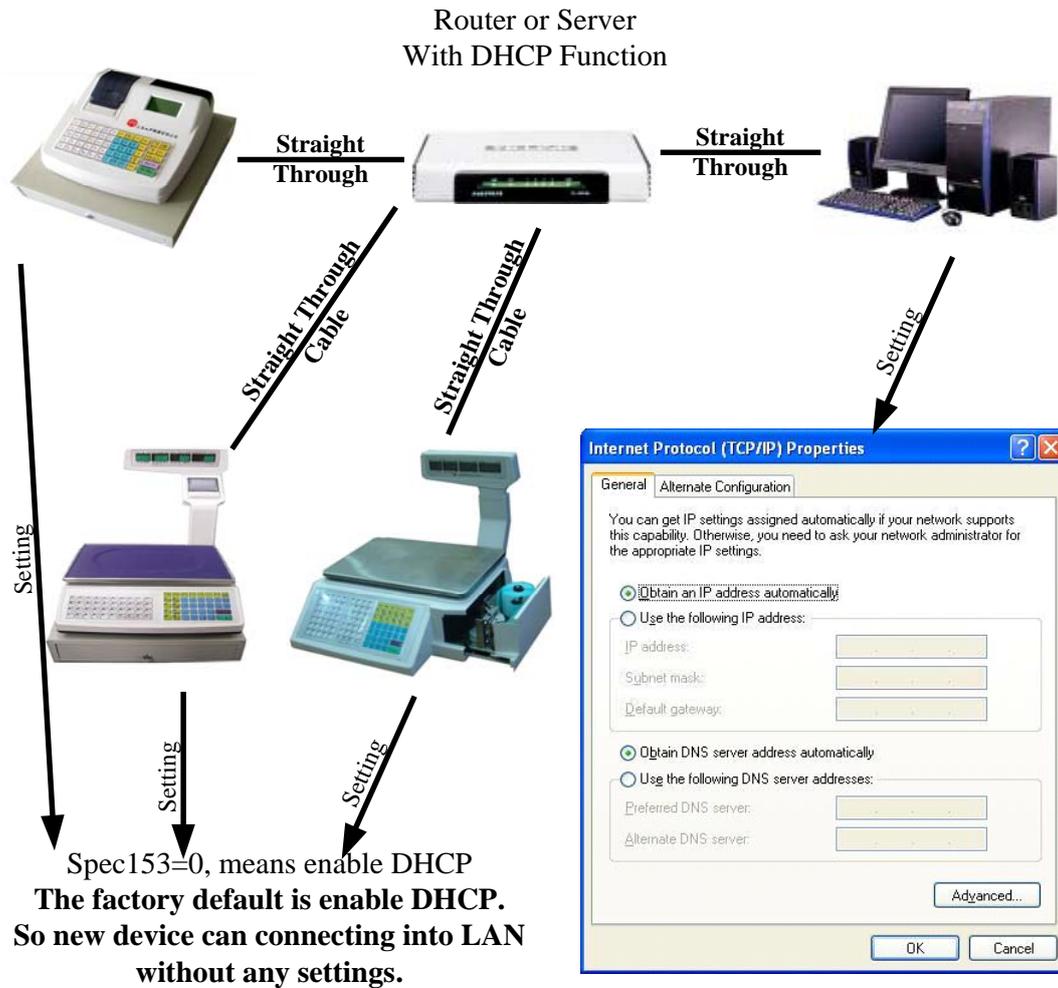

1. Get a wireless router or AP, set its "Security Mode", "SSID" and "Security Password".
- 2a. Edit Spec50=1, Spec51="Security Mode", GlobalText15="SSID", GlobalText16="Security Password" in software, and download them by USB-Disk.
- 2b. Or, Edit Spec50=1, Spec51="Security Mode", GlobalText15="SSID", GlobalText16="Security Password" by device keypad operation. (May a little difficult)
3. Reboot device after Step.2
4. Connecting your PC to Wi-Fi router or AP, open TM-xA software's Etherent Menu.

If you failed to search device in TM-xA software, press keys in order: Prog, 4, 2, Confirm, Confirm. Device will display Wi-Fi link status.

- Link Success: Wi-Fi connected.
- AP Not Found: Device do not found the AP whose SSID=GlobalText15. Check whether GlobalText15 is correctly.
- Link in prog: Try to connect or try to get rssi now.
- Failed Join/ Failed Authent/ Failed Associa/ FailedSecurit: Securit not right, check whether GlobalText16 and Spec51 is right.
